

## Atomic A2 Systems

All Atomic A2 systems are available in both the S version and the TTi version. The S version benefits from the full movement of the base unit, while the TTi version adds engine revs and sound feedback by the use of dual tactile transducers.

### Atomic A2 Racing / Flight System

- Complete motion system for manual transmission racing or yoke and throttle configurations. Just add PC, display and your choice of controllers
- Includes Atomic A2 base w/ internal PSU (110 - 250v AC), foot rest / pedal mount, steering wheel / flight yoke mount, 1 x shifter / throttle mount, racing seat, harness / shoulder pads, SIMPHYNITY software (via digital download) and USB lead
